

The Extreme Light Infrastructure ERIC (ELI ERIC) is the world's largest and most advanced high-power laser research infrastructure. As an international user facility dedicated to multi-disciplinary science, ELI provides access to world-class high-power, high-repetition-rate laser systems and enables cutting-edge research, as well as breakthrough technological innovations. The ELI ERIC operates as a single multi-site organization with two complementary facilities specialized in different fields of research with extreme light: ELI Beamlines in Dolní Břežany (Czech Republic) and ELI ALPS in Szeged (Hungary).

ELI Beamlines Facility operates four cutting-edge high-power femtosecond laser systems reaching unprecedented intensities. The operational laser systems make unique femtosecond sources of X-rays and accelerated particles available to scientific users for pioneering research in physical, chemical, materials, life and medical sciences as well as physics of dense plasmas, warm dense matter, and laboratory astrophysics. The ELI Beamlines Facility employs over 350 researchers, engineers and other professionals from more than 38 countries.

Do you want to see what it takes to be a part of a scientific team and get a taste of what it means to be a scientist?

The **Department of Construction and Design support** provides engineering support to the research departments especially in the areas of mechanical and optomechanical design, vacuum, cryogenic and gas systems, and electrical systems.

In our team we are offering an:

Internship on Compact Multipass Diagnostics (IN-23-2023)

What are you going to do?:

- Propose a concept how to guide the reference laser beams towards the camera for diagnostics. This consists of finding a solution how to position mirrors and lenses with their corresponding holder to achieve the desired optical layout in collaboration with a laser scientist.
- Detailed design of the opto-mechanical setup, consisting of custom parts in combination with off-the shelf opto-mechanics, with the assistance of a senior designer.

Our requirements:

- Autodesk Inventor or similar software basic knowledge
- English language knowledge

Internship's duration:

- 2-6 months
- Start is possible from the 1st or 15th of the month, ideally mid July until September

Our offer:

- Unique opportunity to turn theory into practice within an international research institution in the field of laser technology
- Dedicated mentor
- Specific topic scope – possibility to work on exciting projects within an established team
- Final presentation: Intern conducts final presentation regarding their internship. The event always takes place during the last week of a month when the intern is leaving.
- Completion certificate
- Events for Interns
- Financial remuneration of 170 CZK per hour on an agreement to complete a job (DPP)
- We do not cover accommodation and/or travel and refreshment expenses
- The starting date is either on the 1st or in particular cases the 15th of the month
- Applicants from 3rd countries, outside of EU must obtain necessary visa and working permits prior to the start of their internship.

Shoot your shot and apply!

Application containing your CV and the topic you are applying for with a brief motivation letter should be sent to **Ms. Andrea Fürst** via andrea.furst@eli-beams.eu
