

The Extreme Light Infrastructure ERIC (ELI ERIC) is the world's largest and most advanced high-power laser research infrastructure. As an international user facility dedicated to multi-disciplinary science, ELI provides access to world-class high-power, high-repetition-rate laser systems and enables cutting-edge research, as well as breakthrough technological innovations. The ELI ERIC operates as a single multi-site organization with two complementary facilities specialized in different fields of research with extreme light: ELI Beamlines in Dolní Břežany (Czech Republic) and ELI ALPS in Szeged (Hungary).

ELI Beamlines Facility operates four cutting-edge high-power femtosecond laser systems reaching unprecedented intensities. The operational laser systems make unique femtosecond sources of X-rays and accelerated particles available to scientific users for pioneering research in physical, chemical, materials, life and medical sciences as well as physics of dense plasmas, warm dense matter, and laboratory astrophysics. The ELI Beamlines Facility employs over 350 researchers, engineers and other professionals from more than 38 countries.

Do you want to see what it takes to be a part of a scientific team and get a taste of what it means to be a scientist?

The department of Safety within the Radiation Protection team dealing with dosimetric measurements.

In our team we are offering an:

Internship on Development of dosimetry methods for pulsed fields (IN-20-2023)

What are you going to do?:

During the internship you will be followed by an experienced researcher, expert in their field. Depending on your skills, interests, and experience, you will:

- Participate in the preparation and readout of passive and active dosimetric systems.
- Participate in the design of the experimental set ups.
- Actively participate in the data-taking
- Learn advanced data analysis techniques.
- Learn to conduct in-depth bibliographical research.

Our requirements:

- University-level knowledge or experience of subjects relevant to the project, e.g.: radiation physics, radiation protection, dosimetry

- Analytical and computational skills
- Good English in spoken and written form (minimum B1 level)
- Knowledge of Linux OS would be a plus, but is not required.
- Knowledge of Monte Carlo basics would be a plus, but is not required.

Internship's duration:

- Duration from 1.10. 2023 until 31.12.2023

Our offer:

- Unique opportunity to turn theory into practice within an international research institution in the field of laser technology
- Dedicated mentor
- Specific topic scope – possibility to work on exciting projects within an established team
- Final presentation: Intern conducts final presentation regarding their internship. The event always takes place during the last week of a month when the intern is leaving.
- Completion certificate
- Events for Interns
- Financial remuneration of 170 CZK per hour on an agreement to complete a job (DPP)
- We do not cover accommodation and/or travel and refreshment expenses
- The starting date is either on the 1st or in particular cases the 15th of the month
- Applicants from 3rd countries, outside of EU must obtain necessary visa and working permits prior to the start of their internship.

Shoot your shot and apply!

Application containing your CV and the topic you are applying for with a brief motivation letter should be sent to **Ms. Andrea Fürst** via andrea.furst@eli-beams.eu

Information on the processing of personal data can be found on:
